

6516207606.txt

As a taxpayer and commuter living near the "mixing bowl," in Virginia, it is important to hear the traffic and/or weather that affect my ability to get to work on time each workday. I am paying for a service that I enjoy, and satellite radio fulfills my wishes for news, entertainment, and TIMELY traffic and weather updates. XM radio provides the service when I need it, not every half-hour. If I wish to travel, I have immediate access to weather and traffic updates for several states. I urge you to reject NAB's petition 04-160, and let the market handle it's business.

Thank you.

Taxpayer in Virginia
